PREETI SINGH

Full Stack .NET Developer | C# · ASP.NET MVC · Web API · SQL Server · Azure

+91-7355720364 | ps120906@gmail.com | Lucknow, Uttar Pradesh, India | LinkedIn: linkedin.com/in/preetisingh

PROFESSIONAL SUMMARY

Results-driven Full Stack .NET Developer with 3.5+ years of experience designing and developing scalable enterprise web applications using C#, ASP.NET MVC, .NET Core, Web API, Entity Framework, SQL Server, and JavaScript. Experienced in building end-to-end full-stack solutions (UI, Business Logic, Database), optimizing SQL queries and stored procedures, and resolving production-critical issues to improve system performance and reliability. Microsoft Azure Certified (AZ-900) with knowledge of cloud-based deployments and RESTful API development. Open to opportunities across full-stack, backend, or .NET development roles in dynamic and growth-oriented organizations. Additionally gaining hands-on experience in AI-assisted development and prompt engineering using Large Language Models (LLMs).

TECHNICAL SKILLS

Languages	C#, JavaScript, Python
Frameworks	ASP.NET MVC, ASP.NET Core, .NET Framework 4.x, .NET Core 6+, Web API, Entity Framework, LINQ, ADO.NET
Frontend	HTML5, CSS3, JavaScript, Bootstrap, jQuery
Database	Microsoft SQL Server, T-SQL, Stored Procedures, Views, Functions, Query Optimization, Indexing
Cloud & Tools	Microsoft Azure (AZ-900 Certified), Power Automate, Git, TFS, IIS, Visual Studio, Postman
Methodologies	Agile / Scrum, Full SDLC, REST API Design, OOP, Debugging, Performance Optimization
AI & LLM	Prompt Engineering, Large Language Models (LLMs), Prompt Optimization, AI Response Evaluation, Structured Prompt Design

PROFESSIONAL EXPERIENCE

Software Engineer — Full Stack .NET Developer | **HCL Technologies** *September 2022 – Present (3.5 Years)*

Enterprise IT Services MNC · Lucknow, India · C# · ASP.NET MVC · ASP.NET Core · Web API · SQL Server · Entity Framework · Azure

- Designed and developed enterprise-grade web applications using C#, ASP.NET MVC, Web API, SQL Server, JavaScript, HTML5, CSS3, and Bootstrap, serving thousands of concurrent users.
- Built end-to-end full-stack modules including UI components, business logic layers, and database integration using Entity Framework and LINQ, reducing development handoff time by 30%.
- Developed and optimized 50+ SQL Server stored procedures, views, and complex queries, improving average query performance by up to 40% through indexing and query refactoring.
- Triaged and resolved 100+ critical production incidents, performing root cause analysis and deploying hot-fixes with zero unplanned downtime across enterprise client environments.
- Integrated RESTful Web APIs with front-end modules and third-party services, enabling seamless data exchange and reducing manual workflows for clients.
- Utilized Git and TFS for version control in Agile/Scrum workflows, actively participating in sprint planning, code reviews, and retrospectives within cross-functional teams.
- Leveraged Microsoft Azure and Power Automate to implement cloud-based workflow automation, improving operational efficiency for enterprise ticketing systems.

KEY PROJECTS

Enterprise Ticketing & Workflow Management System *|C# · ASP.NET MVC · ASP.NET Core · SQL Server · Entity Framework · Azure*

- Architected and developed multi-stage workflow modules using ASP.NET MVC and C#, automating approval processes and reducing manual processing time for enterprise clients by over 35%.
- Implemented complex business logic using Entity Framework (Code First), handling concurrent data operations and transaction management across high-volume ticketing workflows.
- Optimised underlying SQL Server queries and stored procedures through index tuning and query plan analysis, cutting average page load time from ~2.5s to under 1.5s.

E-Commerce Web Application *| ASP.NET MVC · C# · SQL Server · Web API · Bootstrap · JavaScript*

- Developed product catalogue, order management, shopping cart, and inventory modules with full CRUD operations using ASP.NET MVC, Web API, and SQL Server.
- Implemented role-based user authentication and authorization using ASP.NET Identity, integrating secure database operations with Entity Framework and LINQ.
- Built RESTful API endpoints consumed by the front-end layer; applied Bootstrap to deliver a fully responsive UI across desktop, tablet, and mobile devices.

Facial Recognition Attendance System *| Python · OpenCV · ASP.NET · SQL Server*

- Built an automated attendance system using Python and OpenCV for real-time facial detection and recognition, achieving 95%+ identification accuracy on a 200-person dataset.
- Integrated the Python recognition engine with an ASP.NET front-end interface and SQL Server backend, enabling centralized attendance reporting and administrative dashboards.

EDUCATION

B.Tech — Computer Science Engineering **CGPA: 9.12 / 10**

KIPM College of Engineering & Technology, Gorakhpur, Uttar Pradesh

CERTIFICATIONS

- **Microsoft Azure Fundamentals (AZ-900)** — Microsoft
- **Python Programming** — IIT Kanpur
- **Entity Framework Development** — Online— Verified Course
- **Full Stack Web Development** — Online — Verified Course
